

## JANTEX WATERBASE MATCHING SYSTEM

Jantex Inks has developed a **water base matching system** with software that can allow you to match to virtually thousands of colors within its spectrum.

With the new JMS formulation software program you can color match to both light and dark garments using either our **JMS Extender Base** or **JMS DISCHARGE BASE**. You can create and save custom made JMS colors. Additionally the software can automatically add auxiliary products like fixer, softener as well as the parolite needed for discharge.

JMS includes 10 primary colors along with 2 auxiliaries for added color range. The colors are as follows:

JMS BLACK 02	JMS RED 08
JMS BLUE 03	JMS SCARLET 09
JMS BLUE 04	JMS VIOLET 10
JMS GREEN 05	JMS YELLOW 11
JMS MAGENTA 06	JMS FLS PINK A1
JMS ORANGE 07	JMS ROYAL A2

The JMS System is available in a convenient kit which includes the software, all 12 colors, JMS Extender Base and Discharge Base as well as all auxiliary components. The kit can also be purchased with a high quality scale for a great price.
